Revel® PERFORMA³ Loudspeakers

The Performa3 Series is the latest expression of Revel's unparalleled acoustical research and technological resources. This range of ten all-new models combines audiophile-caliber performance with furniture-grade cabinetry in a design that is both purposeful and elegant. These models achieve their superior sound quality with proprietary drivers including an aluminum diaphragm tweeter mated to an acoustical lens waveguide and powerful cast-aluminum frame midranges and woofers with ribbed aluminum cones. Premium network components including air-core inductors and polypropylene capacitors ensure that the signal path remains crystal clear. Internally braced enclosures with curved side panels minimize potential cabinet-induced colorization and are finished in a choice of high-gloss wood veneer or automotive-grade painted finishes.
